## FUNGHICLEAR™ IMPROVING TOENAIL/FOOT HYGIENE

With 1 in 4 adults suffering from fungal infection of toenails or feet, FunghiClear's Manuka, Basilicum, Lavender and Peppermint Natural Oil Blend will help to keep your feet and toenails in good hygiene and healthy appearance. Whether you are wearing shoes, slippers, exercise gears, your feet and toenails are exposed to possible fungal infection. Protecting your feet and toenails in good hygiene with product such as FunghiClear is important.

### ✓ Recommended by professionals

Through a unique formulation of natural active ingredients, FunghiClear provides a safe and effective solution that helps restore and protect toenails and feet from problem due to exposure to fungal growth. In a recent clinical study<sup>1</sup>, more than 80% of users reported a significant improvement in the appearance of problem toenails that were exposed to fungus. This is the reason why care professionals, such as podiatrists and podologists in EU have been recommending FunghiClear.

### ✓ 100% natural active ingredients

FunghiClear™ Foot and Toenail Spray is the natural alternative to other chemical and synthetic products that are currently available. FunghiClear's unique blend of Manuka, Basilicum, Lavender and Peppermint Oil makes the feet skin and toenails unattractive for fungi to grow. Hence your feet and toenails will be protected in healthy appearance.

Manuka-oil, an essential ingredient with well-documented anti-fungal, anti-bacterial and anti-viral properties.

Basil-oil is known for its anti-septic, immune supportive, and anti-fungal characteristics. In addition it helps to transport the Manuka-oil.

Menta Piperita-oil has a cooling and soothing effect. Therefore, it helps to prevent itching and irritated skin.

Lavender-oil has been added to give our product a pleasant smell, which makes it easier to use twice a day for several months. It is also known for its skin improving qualities.

The basis of many of our products is Manuka-oil, the key ingredient with anti-fungal, anti-bacterial and anti-viral properties that have been scientifically documented. The use of Manuka-oil for medical purposes has been long known to the Maori, the indigenous people of New Zealand, and our toenail and foot hygiene spray bases its effectiveness on the oil's ability to help creating an ecosystem prohibitive for fungal growth.
